Regulating job order contracting for public works.

(DIGEST OF PROPOSED 2ND SUBSTITUTE)

Authorizes public bodies to use a job order contract for public works projects when: (1) A public body has made a determination that the use of job order contracts will benefit the public by providing an effective means of reducing the total lead-time and cost for public works projects or repair required at public facilities through the use of unit price books and work orders by eliminating time-consuming, costly aspects of the traditional public works process, which require separate contracting actions for each small project;

(2) the work order to be issued for a particular project does not exceed two hundred thousand dollars;

(3) less than twenty percent of the dollar value of the work order consists of items of work not contained in the unit price book; and

(4) at least eighty percent of the job order contract must be subcontracted to entities other than the job order contractor.

HB 2406-S by House Committee on Natural Resources (originally sponsored by Representatives Regala and Buck)

Changing salmon recovery provisions.

(DIGEST OF PROPOSED 1ST SUBSTITUTE)

Requires the board to establish a time limit for the completion of projects that are awarded funds under RCW 75.46.170. The time limit imposed by the board for completing projects shall provide for timely completion of projects but allow adequate time for projects that by their nature require multiple years to accomplish. The time limit may not exceed five years from the time the funds are awarded. The board shall not require the project sponsor to reapply to the board for these same funds in subsequent funding cycles within the time limit imposed by the board.

Clarifying what projects are eligible for funding by the salmon recovery funding board.

(DIGEST OF PROPOSED 1ST SUBSTITUTE)

Authorizes the board to award a grant or loan for a salmon recovery project on private or public land when the landowner has a legal obligation under local, state, or federal law to perform the project, when expedited action provides a clear benefit to salmon recovery. In making its determination to award the grant or loan, the board shall at least consider the resources of the private landowner and the potential harm to salmon recovery if the project is delayed. Project sponsors and lead entities must identify to the board any project submitted for funding that must be performed under a legal obligation, and must provide justification as to why the project should receive public funding at this time. For purposes of this provision, a legal obligation does not include a project required solely as a mitigation or condition of permitting.

Authorizes the board to condition a grant or loan to include the requirement that property may only be transferred to a federal agency if the agency that will acquire the property agrees to comply with all terms of the grant or loan to which the project sponsor was obligated. Property acquired or improved by a project sponsor may be conveyed to a federal agency, but only if the agency agrees to comply with all terms of the grant or loan to which the project sponsor was obligated.
